MWM Logistics Center

Newly opened.

MWM
Energy. Efficiency. Environment.

**Efficient.
Reliable.
Competent.**

The centrally-located spare parts logistics centre in Lorsch.

Logistical efficiency

The Lorsch Logistics Center is the central storage location of the MWM service network for all spare parts. This is where the organisation coordinates its worldwide shipping service to its customers and the "across-the-board" supply of the MWM service centres.

Due to its close proximity to the manufacturing of Mannheim, the Lorsch Logistics Center itself guarantees absolute logistical efficiency. Only 50 kilometres away from Frankfurt Airport, in-house air freight partners also ensure fastest possible shipping via air delivery – urgent orders received by 5.00 pm leave the Frankfurt hub the very same day.

State-of-the-art warehousing technology makes it possible to achieve the highest level of supply security. Intelligent logistics systems and control via a de-centralised warehouse management system or operational support from mobile data recording terminals characterise the efficient Logistics Center. The entire supply chain – order centre, warehousing logistics and scheduling – is located under one single roof.

Over 40,000 different articles – from 20t crank-cases to 1g O-rings – are in store at the MWM Logistics Center and can be delivered around the clock. Permanent availability and transparent processes ensure the security of business processes. All this allows MWM to offer its partners the highest service quality in the life cycle of their products.

Facts and figures:

Storage space	12,000 sq m
Office and common space	600 sq m
Parts numbers in stocks	Ø 40,000
